The New Cornet Skirt.

The new "cornet" skirt has a foundation skirt of five bell gores, and is made with a slight train, which is easily shortened if desired. The front presents the fashionable sheath effect and the back widens gradually to the edge of the slight train and partly conceals the side seams. The back is lined with crinoline to produce the flaring effect from which the skir: takes its name; and the cor net plait is secured against disarrangemen by two short clastic straps underneath. The use of the foundation skirt is optional. The skirt is very graceful in effect, and makes up handsomely in cloth, serge, vicuna, camel's hair and India cashmere.

Three is always possible to obtain some ingenious conceived "combination" after the fashion of this pretty little washstand and dressingtable. It will stand unobtrusively in quite a small recess, and is specially constructed with the idea of utilizing space.

The Time to Fat

There has been a good deal of discussion as to the best time for eating certain articles of food. For instance, we are advised not to eat meat late in the day, not to take fruit just before retiring, and to avoid tea and coffee in the evening if a wakeful night is not desired. Men of mature years and good stomachs are not devoting much time to studying these questions. They will tell you that watermeions never tasted better than on a dark night when the dog was chained and the cwner of the patch was sleeping after the weary labors of the day. Apples never were so sweet as when an entrance was surreptitiously effected into the rear end of the orchard and the invader punished the stolen fruit with an assurance that the proprietor was not within eyeshot. Cakes, pies and preserves were eaten whenever the eyes of watchful and solicitous parents were temporarily off duty. Green cucumbers were smuggled to bed and eaten to the still watches of the night, while raw turnips were generally enjoyed on the top of a stake.
